---

Thank you Lisa for comments. Yes I agree, Jackie should be receiving the information. You are correct, there are two or more Young's on our site distributions. Anyway, more news to come on the cap repair status.

Donn

Thank you for the information -- and to EPA for following up with this issue. It is good to know what is going on, and to have some information for people who ask about activity at the site.

Jackie hasn't been copied on this message and the message yesterday. I don't know who the J Young copied on this message is, but it isn't Jackie. I understand that sometimes Jackie has been told the information by phone before these messages are sent, but please include Jackie on future messages of this type. She then better knows what has and hasn't been sent to CAC participants, and who already has some specific information.

Lisa Gossett

**Subject:** CAC notification. SJRWP Update

Community Awareness Committee;

We wanted to alert you to some new information regarding the San Jacinto Waste Pits Site:

In response to EPA's directive, the potential responsible parties submitted a work plan on December 21. The Plan addresses EPA's requirements to delineate damage to the cap, collect sediment samples to determine if any materials were released into the environment, and conduct necessary repairs.

EPA has approved the portions of the PRPs' plan to begin delineation of the damaged area and collection of samples and this activity will begin immediately on Wednesday, December 23.

EPA will continue to work with the PRPs on the portion of the plan regarding the necessary repairs. Equipment and materials to repair the cap are expected to arrive on December 29 and will take from 1 to 2 weeks to complete. EPA will be on-site during the assessment and repair activities to ensure compliance with the approved work plan. Quality assured sample results will be available to the public.

Thanks.
